

## SILVERMINE BV's EXPANSION PLANS

November 2017

Dutch car manufacturer Silvermine bv has designed a unique track-day car, called **Silvermine 11SR**.

A prototype has been built and the car is now in the testing phase. More information about this track-day car can be found on [www.Silvermine.nl](http://www.Silvermine.nl)

The prototype will be developed further into a marketable product, to be produced in small numbers. A marketing plan is in the making, to support presentation and sales.

For marketing and production of the cars (planned start: springtime 2018) the company has to expand, increasing the present workforce of the creator and builder of the car.

Therefore **Silvermine bv** is looking for two or three persons who are willing to join me in the planning and execution of these actions as a business, with the existing design and the prototype car as a starting point. I am looking for persons who are ready to participate in my company, persons who are willing to invest money and time in starting up the (production) company.

For their investment, participants will receive Silvermine bv shares. This is a real challenge for enterprising car lovers with a technical education. Persons who see the opportunity to do technically challenging work with a business-oriented approach. They could regard my company as their own start-up business, making an investment to finance the start of the production activities. Their advantage will be to work with an existing and arguably proven product.

### Profile:

- Completed education in engineering at MSc or BSc level.
- Affinity with technology, passion for (race)cars.
- Entrepreneurial attitude.
- Willingness to take on all jobs and to build up skills in production techniques.
- Understanding the importance of details.

If you are seriously interested in this opportunity, you are kindly requested to contact me, preferably by means of e-mail.
